Are you also pulling data for Town of Port Edwards, Wood county residences? Justin Conner can help with any GIS needs you have for Wood County. I believe I forwarded his email already.

I am hoping we are able to secure grant funding so we can do more extensive testing. It would be great if we could get additional parameters tested. Are you considering doing an age study to help determine the age of the water at different depths? I know this process determines how long it took for water that was on the top of the ground to penetrate to various depths. I am not sure how that works, but I know it can be done. Wish I was better with the chemistry of all of this.

Nancy

Hi Nancy:

I am still working on getting the GIS file uploaded to my ArcGIS file, I am having trouble. Dean will be in on Thursday and I will see, if he is able to bring in the shapefiles in for the addresses of people in the Town of Armenia. We will then be able to see what houses would work best to determine sources. I would also like to discuss with you and ask my Supervisor if EPA might be able to assist with the sampling to get additional parameters tested, possibly pesticides.

Subject: Wood Co Wi Water Testing

Hi Cheryl,

We are considering our next round of water sampling and would like to look to you for suggestions on when to do the sampling, and locations that may be helpful for your investigation, and for our citizens. We would once again be including both the Town of Port Edwards in Wood County, and the Town of Armenia in Juneau County. We are thinking that the people are nervous about the safety of their water, and we would likely need to do the sampling this fall vs waiting till next spring. We have applied for some grant funding, and if we get this money, we could do it in two different batches, one this fall, and another in spring, or all this fall. We need to also check with UWSP on their availability to handle another water survey for us.

Thanks Cheryl, for your help with this process.
Nancy
